RETRO-COMMISSIONING **PROGRAM**

Maximize your facility's energy performance with the **Retro-commissioning Program** from FirstEnergy's Pennsylvania electric companies.

Every business has potential to operate more efficiently, and our program is here to help! We provide a comprehensive mix of energy-saving custom measures for non-residential buildings that can help save as much as 20% on energy bills.1 Even better, FirstEnergy's Pennsylvania electric companies offer up to \$10,000 to cover the cost of an in-depth energy analysis.

Available Retro-commissioning Improvements

- Optimizing HVAC equipment scheduling, setpoints and system control sequences
- Restoring economizer operation
- Repairing sensors and other critical system components
- Minimizing/eliminating simultaneous heating & cooling
- Reducing minimum airflow setpoints
- Program to "Reset" setpoints with outside air temperature:
 - Static Pressure
 - Supply Air Temperature
 - Chilled/Hot Water Supply Temperature
 - Pump Pressure
 - Condenser Water Temperature
 - Discharge/Suction Pressure (Refrigeration)

PROGRAM BENEFITS

Save on monthly energy costs with electric energy efficiency improvements

Achieve comfortable and convenient energy efficiency for both you and your tenants

Find Out If Retro-commissioning Is Right for You!

PROGRAM PARTICIPATION

From enrollment to incentive, we make it easy to find the best energy-efficient solutions for your facility.

Provide Willdan or FirstEnergy Program Ally with your building's specifications

A contractor performs an evaluation or audit for energy efficiency improvements bundled with whole-building strategies

You work with a FirstEnergy Program Ally to complete the scope of work

Verify

Measure and verify to confirm the improvements are achieving anticipated savings

Receive your financial incentive based on the final scope of work and calculated energy savings

Customer Eligibility Requirements

- Facility must be at least two years old
- Serious interest and capability in implementing operational measures in a timely manner
- Systems that are relatively free of upgrades/ replacements

Available Incentives

Utility incentives are offered for all eligible energy efficiency measures, based on the following incentive rates for verified savings:

- All verified energy savings for the Retrocommissioning Program will be paid \$0.10/kWh.
- Additional incentives are available for:
 - Energy Audit: Eligible participants will also receive up to 50% of the cost of an energy audit or \$10,000, whichever is less.

TYPICAL MARKETS

Most businesses can benefit from retro-commissioning. Businesses with larger, conditioned buildings and higher energy use can realize greater savings by participating.

Healthcare

Distribution Centers

Office/Government **Buildings**

Food Processing Facilities

Refrigerated Warehouses

Facilities

TYPES OF CONTINUOUS COMMISSIONING

Retro-commissioning involves the tuning and calibration of existing building systems. Over time, typical building systems go out of calibration and require tuning to maintain ongoing efficiency.

Recommissioning re-examines buildings that may have been previously commissioned to ensure it is once again running at optimal performance.

FirstEnergy's Pennsylvania electric companies have a suite of programs to benefit all customer sizes and project types. To view all available Commercial and Industrial offerings please go to energysavePA-business.com.

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit energysavePA.com.

By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs. PA customers who have existing contracts with third party demand response service providers that were executed before June 1, 2021 (i.e., the start of Phase IV of Act 129 EE&C), have the option of retaining the PJM capacity rights associated with EE&C projects when participating in FirstEnergy PA Act 129 energy efficiency and peak demand reduction programs.

FirstEnergy's Pennsylvania electric companies, their parents, subsidiaries, employees, affiliates, and agents assume no responsibility for the performance of the equipment or equipment warranty, the quality of the work, labor and/or materials supplied, and/or the acts or omissions of any contractor.2
