RETRO-COMMISSIONING PROGRAM

Maximize your facility's energy performance and save with FirstEnergy's Retro-commissioning Program.

Every business has potential to operate more efficiently, and our program is here to help! We provide a comprehensive mix of energy-saving custom measures for non-residential buildings that can help save as much as **20% on energy bills**.¹ Even better, FirstEnergy offers **up to \$10,000** to cover the cost of an in-depth energy analysis.

Available Retro-commissioning Improvements

- Optimizing HVAC equipment scheduling, setpoints, and system control sequences
- Restoring economizer operation
- Repairing sensors and other critical system components
- Minimizing/eliminating simultaneous heating & cooling
- Reducing minimum airflow setpoints

Additional Upgrades Available from FirstEnergy

- HVAC equipment replacements
- Roofing upgrades
- Window replacements & film
- Adding variable frequency drives (VFDs)
- Premium efficiency motors
- Adding energy recovery units
- Adding demand control ventilation (DCV)
- Qualifying ENERGY STAR® appliances

PROGRAM BENEFITS

Save on monthly energy costs with electric energy-efficiency improvements

Achieve comfortable and convenient energy efficiency for both you and your tenants

Increase equipment life-cycle

Find Out If Retro-commissioning Is Right for You!

PROGRAM PARTICIPATION

From enrollment to incentive, we make it easy to find the best energy-efficient solutions for your facility.

1

Enroll

Provide us with your building's basic information

2

Analyze

Real-time evaluation of energy-efficiency improvements bundled with whole-building strategies

3

Implement

You work with a FirstEnergy Program Ally to complete the scope of work

4

Verify

Measure and verify to confirm the improvements are achieving anticipated savings

5

Final Payment

Receive your financial incentive based on the final scope of work and calculated energy savings

Customer Eligibility Requirements

- Facility must be at least two years old
- Serious interest and capability in implementing operational measures in a timely manner
- Systems that are relatively free of upgrades/replacements

Available Incentives

Utility incentives are offered for all eligible energy-efficiency measures, based on the following incentive rates for verified savings:

- All verified energy savings for the Retro-commissioning Program will be paid \$0.10/kWh.
- Additional incentives are available for:
 - **Energy Audit:** Eligible participants will receive an incentive, up to 50% of the audit cost or \$10,000, whichever is less.

TYPICAL MARKETS

Most businesses can benefit from retro-commissioning. Businesses with larger, conditioned buildings and higher energy use can realize greater savings from participating.

Healthcare

Office/Government Buildings

Education

Hotels

Retail Stores

Refrigerated Warehouses

Distribution Centers

Manufacturing Facilities

Food Processing Facilities

TYPES OF CONTINUOUS COMMISSIONING

Retro-commissioning involves the tuning and calibration of existing building systems. Over time, typical building systems go out of calibration and require tuning to maintain ongoing efficiency.

Recommissioning re-examines buildings that may have been previously commissioned to ensure it is once again running at optimal performance.

FirstEnergy's Pennsylvania utilities has a suite of programs to benefit all customer sizes and project types. To view all available Commercial and Industrial offerings please go to energysavePA-business.com.

The costs of energy efficiency programs are recovered through customer rates in accordance with PA Act 129 of 2008. For a complete list of commercial, industrial, residential, and low-income energy efficiency programs, please visit energysavePA.com.

By participating in these energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights which refers to the demand reduction associated with any energy efficiency and peak demand reduction measure for which incentives were provided by the Company. Your utility will aggregate these energy efficiency demand reduction attributes into the PJM capacity market with proceeds being used to offset the program costs.

FirstEnergy's Pennsylvania utilities, their parents, subsidiaries, employees, affiliates, and agents assume no responsibility for the performance of the equipment or equipment warranty, the quality of the work, labor and/or materials supplied, and/or the acts or omissions of any contractor.²
