

BIG IDEAS FOR ANY SIZE BUSINESS

PotomacEdison®
A FirstEnergy Company

EmPOWER
MARYLAND

COMMERCIAL NEW CONSTRUCTION PROGRAM

This program provides commercial customers with complimentary energy design assistance and financial incentives to help offset the cost of implementing energy-efficient strategies in new construction and major renovation projects. We help you identify the most cost-effective efficiency strategies with the biggest impact, pick the best fit for your goals, and analyze energy savings and eligible incentives. When your project is complete, we confirm it was built to plan and issue a verification report.

BUILDING TUNE-UP & RETRO-COMMISSIONING PROGRAM

The BT/RCx Program provides a comprehensive mix of energy-saving measures for non-residential buildings of all types, whether you need a simple HVAC system tune-up or real-time energy management analytics. Save up to 75 percent off installed equipment when you bundle building tune-up upgrades. RCx projects can save 10–20 percent of annual energy usage through in-depth analysis and recalibrate key building systems.

SMALL BUSINESS DIRECT INSTALL PROGRAM

AVAILABLE TO BUSINESS CUSTOMERS WITH AN AVERAGE ELECTRIC DEMAND OF 100 kW OR LESS.

The SBDI Program provides a turnkey solution for commercial accounts with average monthly demands under 100 kW. We help you select the best products for your upgrade, manage the installation process, and provide enhanced warranty support. Our energy advisors will guide you through energy-saving upgrade options and help your business get the best possible savings. Incentives cover up to 80 percent of the installed project cost.

EmPOWER Maryland programs are funded by a charge on your energy bill. EmPOWER programs can help you reduce your energy consumption and save you money. To learn more about EmPOWER and how you can participate, go to energy.maryland.gov/Pages/Facts/empower.aspx.

By participating in energy efficiency and peak demand reduction programs, customers agree to allow their utility to retain ownership of all Capacity Rights, which refers to the demand reduction associated with any energy efficiency or peak demand reduction measures for which incentives were provided by the Company.
